

Professional Development Associates, Inc.

PDA is a team of industry experienced engineering faculty dedicated to serving the continuing education needs of students and practitioners of engineering.

Our goal is to create instructional products to help students and engineers prepare for professional licensure, acquire new knowledge and update existing expertise. Through our unique audio enhanced **PowerAudio™** delivery system, technical information and engineering knowledge is provided conveniently and effectively when and where you need it!

Here's How to Order

Step-by-Step Process

Problem solutions are easy to follow and understand. Their organization is based on the teaching experience of the PDA team. Concepts and their applications are presented in a step-by-step process that explains the how and why of the problem solution. Unlike a classroom environment **PowerAudio™** permits the user to replay and review material at his or her own pace. The CD can be used on any PC or laptop - anywhere and anytime!

By using the FE Review, I felt more confident in passing the exam.

- Valerie V.

Power Audio™

This problem-based review uses the unique PDA audio-enhanced **PowerAudio™** educational system. This instructional system is a convenient and effective educational process that uniquely integrates text and graphics with animation and full audio. The problem-based educational content is delivered on CD in modules that use Real Player™ on your PC.

Prepare For the FE Exam

Understand Engineering Principles

Multimedia CD Included

Professional Development Associates, Inc.

has the solution!

Fundamentals of Engineering Review

This problem-based review is designed to help graduating seniors, practicing engineers, and undergraduates in understanding and learning engineering fundamentals. *Graduating seniors* and *practicing engineers* can use it to help pass the national Fundamentals of Engineering Exam. *Undergraduates* can use it to gain a clearer understanding of engineering principles in the basic courses common to most engineering curriculums.

What You Get

- Review notebook containing over 310 questions and PowerAudio™ solutions on CD
- Problem statements with space to solve each problem
- Suggested strategy guide
- CD with audio-enhanced solutions to all problems
- Problem solutions organized according to the twelve subject areas of the FE Exam

Subject Areas Covered

- ▶ Chemistry
- ▶ Computers
- ▶ Dynamics
- ▶ Electric Circuits
- ▶ Engineering Economics
- ▶ Ethics
- ▶ Fluid Mechanics
- ▶ Materials Science
- ▶ Mathematics
- ▶ Mechanics of Solids
- ▶ Solid Statics
- ▶ Thermodynamics

Users Say:

Studying for the FE Exam has never been so:

- Easy
- Convenient
- Understandable

To listen and learn how the system works, go to www.pda2learn.com and click on Sample Problems.

The CD/notebook was the single best study guide I used for the FE Exam, especially the last few weeks before the exam.

- Dean E.

Special Offer for Student Chapters

You can make money for your student chapter. We have a special offer that will put \$50.00 or more in your student chapter account.

With a minimum order of 5 copies, PDA will write a check to your student chapter totaling \$10.00 per copy per order. Order 5 copies, your student chapter will receive a check for \$50.00. Order 10 copies and a \$100.00 check will be mailed to your student chapter.

In addition to this special offer, we will take an additional \$10.00 off the retail price, making it \$79.95 per copy for single orders of 5 or more - we will even pay the shipping!

Take advantage of this limited time, special introductory offer today!

For Student Chapter Orders

Visit our website for printing an order form or order by credit card at www.pda2learn.com [Applicable taxes will be added.]
